Ages & Stages Questionnaire - Social/Emotional (ASQ-S/E)
The Ages & Stages Questionnaires: Social-Emotional (ASQ-SE) is a child-monitoring system for Social-Emotional behaviours. It was developed to compliment the Ages & Stages Questionnaire (ASQ-3) developmental screening tool by providing information specifically addressing the social and emotional behaviour of children ranging in age from 3 to 66 months. The ASQ: SE is a screening tool that identifies infants & young children whose social or emotional development requires further evaluation to determine if referral for intervention services is necessary. Developmental areas covered by this screening tool include: self-regulation, compliance, communication, adaptive functioning, autonomy, affect and interaction with people. Workshop participants will learn how to use the ASQ:SE® with families in their program and learn more about children's social and emotional development.

About the Facilitator: Kirsten Bevelander
Kirsten is a Provincial Child Care Advisor who works for the BC Aboriginal Child Care Society. This position is part of the CCRR Program, funded by MCFD. The BC ACCS advisors visit child care providers and Aboriginal centers around the Province and provide support through training, and sharing of resources. Kirsten is the mother of three sons aged 11 to 19 years. She has worked with children and families for over 25 years, specializing in toddler care, literacy learning and Aboriginal Supported Child Development. Kirsten holds a Diploma in ECE and is currently studying Child and Youth Care at the University of Victoria. Kirsten also instructs Children's Language and Literature for the Burnaby ECE Continuing Education Program.
